Chapter 1

Summary: Efforts to find a South African or International Psychiatric or Psychological Organisation or Psychiatrist or Psychologist Professional whose Organisational or Individual Professional Ethics compel them to (i) base their psychological social conflict mitigation and reduction management therapy practice based upon Ecological Reality Facts; and (ii) testify under oath to observable Ecological factual reality in any court of law.

Ecological Reality Facts being: (a) Earth is not flat; (b) Earth renewable and non-renewable resources are finite; (c) When humans breed or consume above ecological carrying capacity limits, it results in resource conflict; (d) To sustainably protect and conserve natural resources in accordance to local and national carrying capacity limits; and restrict national and international inter-cultural resource war conflict; humans must implement an international law social contract that restricts all the worlds citizens to breed and consume below ecological carrying capacity limits.

EoP response to USASOC: DCoE Psych Health & TBI Challenge

As per the repeated suggestion from [US Army Special Operations Command](#)¹⁷: I have perused the [Defense Centers of Excellence for Psychological Health and Traumatic Brain Injury Challenge](#)¹⁸ pages. The challenge appears zero-sum win-lose game focused; as opposed to sincere problem solving win-win focused.

Summary: In the absence of [Masonic War is Peace](#)¹⁹ military health officials confronting the [root breeding/consumption war causes of resource conflict](#)²⁰; efforts such as the DCoE's Mental

²⁰ <http://sqswans.weebly.com/military-gospel.html>

Health challenge appears to be nothing more than a bullshit the public relations image management campaign of “Lets pretend we give a fuck about soldiers mental health while doing sweet fuck all about the root -- breeding & consumption war -- causes of -- military, economic, cultural, religious, racial, cultural, psychological -- resource war conflict”.

I could not find any definition for 'mental health' or 'mental disorder' or 'post traumatic stress disorder'. This may sound strange; but having traveled in many cultures; I don't automatically assume that individuals from other culture's; with different religious, racial beliefs to my own, some with fuck all interest in science and evidence; would have the same definition as I do regarding what they consider to be 'mental health'; or what may or may not be an alleged scientifically verifiable 'mental disorder'.

Mental Health in Ecology of Peace culture:

As you are aware: I am a member of an [Ecology of Peace culture](#)²¹ [EoP Oath ([PDF](#)²²)]. There is no such thing as legal 'mental illness' or 'mental disorder' in the Ecology of Peace culture.

According to Ecology of Peace social contract principles; all members are required to breed and consume below carrying capacity limits; and conduct their relations with other humans based upon fully informed consenting agreements.

If or when an individual engages in non-consensual behaviour with another; its simply that: non-consensual. The violation may be found to be justified or unjustified. If unjustified; no matter how offensive to another person; it would not be a 'mental disorder'.

Significant differences exist in Masonic War is Peace sub-cultures. For example some sub-cultures value constructive criticism and scientific reality as the basic foundation of their socio-economic problem solving and inter-cultural relations; at least as an ideal if not always adhered to; whereas other sub-cultures have an obsessive demand for sycophantic flattery, bullshit the public relations; perception management and secrecy.

Mental Health in Masonic War is Peace cultures:

I am aware of members of Masonic cultures criticism of other Masonic War is Peace culture's application of 'mental disorder' allegations; among others: [Political Psychiatry, Social Control and Big Pharma](#)²³; [Psychiatry is a Fraud](#)²⁴; [The DSM: Psychiatry's Deadliest Scam](#)²⁵; [Psychiatry: An Industry of Death](#)²⁶; [Age of Fear: Psychiatry's Reign of Terror](#)²⁷; [Psychiatry in the Military: The Hidden Enemy](#)²⁸.

Similarly mainstream Masonic Psychiatrists and Psychologists continue to pretend that [psychotronic ELF technology](#)²⁹ does not exist; let alone being willing to consider how such

²⁹ <https://www.youtube.com/watch?v=sfgZrRoflCI>

psychotronic ELF technology is and has been used by military intelligence agencies; against their own or each others military and civilian populations.

Whereas Stalinist Communist were honest about their intentions to use psychological ‘mental disorder’ allegations as a tool of domination and control to silence Communist heretics; Fortune 500 Capitalist’s psychological coercion ‘sanity for sale’ psycho-priests [similar to ‘innocence for sale’ lawyers, prosecutors and judges]; hide their corporate parasitic motives to profit from creating as many ‘mental disorder’ consumer hosts as possible for their parasitic profit; all while pretending to care about the alleged ‘mental health’ of their consumers.

Ecology of Peace culture correspondence and legal applications to Masonic War is Peace psychologists and Courts include:

1. [Ecology of Peace –v– Masonic War is Peace legal submissions](#)³⁰ to various national and international courts; some of them dealing with psychological issues; such as in the [correspondence to Masonic Psychologists](#)³¹; and applications to EU Court of Human Rights and Norwegian Courts on behalf of Anders Breivik’s right to legal sanity and a treason trial; equivalent to the treason trial given Nelson Mandela by the Apartheid government.
2. [Fraud complaint to FBI against Brad Blanton & Radical Honesty culture](#)³²: Annex 4B: Request for Info: Contact Details for SA Psychologist with theoretical and kinaesthetic experience in: Radical Honesty, Gestalt, Psychodrama, Psychotronics, Political and Legal Activism against the Edward Bernaysian Psychological Tyranny as depicted in ‘Century of the Self’, ‘Marketing of Madness’, ‘Psychiatry: An Industry of Death’ [[PDF](#)³³].

A summary of my experiential observations about the Masonic War is Peace alleged ‘mental health’ system’s alleged ‘expert’ practitioners:

- ❖ I am unaware of any Masonic War is Peace scientist, doctor, psychologist or psychiatrist whom has ever legally accused another individual of suffering from any 'mental disorder'; or Judge who has consented to the denial of liberty of such a person based upon alleged ‘mental disorder’ allegations who:
 - has been willing to unequivocally acknowledge their cognitive awareness of the reality that (a) the earth is not flat; (b) Earths resources are not infinite; (c) procreating and consuming above ecological carrying capacity limits results in resource conflict; and consequently psychological and psycho-social conflict over natural resources; (d) in order to reduce or eliminate the psychological effects of resource conflict; it is necessary to confront and eliminate the root breeding/consumption causes of resource conflict.
 - has provided a crystal clear legal definition for the basis of their alleged ‘mental disorder’ allegation;
 - has provided any ‘mental disorder’ definition; that includes reference to the contextual resource warfare social contract reality underpinning the source of the

psychological and psycho-social conflict manifesting as the alleged 'mental disorder'.

- prior to such allegation against another; cared enough about ethics and honour; to apply their 'mental disorder' definition psychoanalysis first to themselves and their own beliefs and behaviors; to rid themselves of any of their own 'mental disorders' before attempting to pretend to giving a fuck about helping someone else fix their mental disorders.
- was capable of sincere active listening; i.e. verifying that their interpretations of whatever their client or the accused had said; was accurate; before simply assuming; based upon their own cultural, racial, class, religious beliefs; that they 'know' and accurately interpreted what their client, or the accused; said and meant.

Village idiot Common Sense oddities about Masonic cultures alleged 'mental disorders':

Many people will cite the loose definition of 'doing the same thing over and over again and expecting a different result' as a definition of 'insanity' or 'mental illness'. However consider a psychologist sitting on a hill looking down on Orville and Wilbur Wright's repeated attempts to get their planes to fly. Such psychologist simply observes from afar, and makes no effort to notice the very small alterations the Wright brothers made after each failure. Such a psychologist would have had the Orville brothers committed to a mental institution as 'insane'.

In the [BBC documentary about John Nash](#)³⁴; a psychologist defines "schizophrenia" as "severe mental illness characterized by hallucinations, delusions or peculiar forms of thinking." Yet none of these psychologists demand the institutionalization of millions of Christians and Catholics who believe in a supreme being they call 'god' whose existence has yet to be proven; or millions of Muslims who believe in a being they call 'allah'; whose existence has yet to be proven. Surely if these Masonic WiP psychologists definitions are scientifically based and non-discriminatory in terms of delusions and hallucinations; then if one person can be institutionalized for a delusion; hundred or thousand should be similarly institutionalized for their delusions. Until the existence of God and Allah are scientifically proven; I think we can say that its possible the belief in 'God' and 'Allah' can be considered a 'delusion'.

So why do psychologists tolerate some people's delusions as 'sanity' if they call those delusions 'religious beliefs'; whereas others delusions are 'insanity'? How can they consider themselves credible objective observers and analyzers of 'reality'? Do they know the difference between facts and interpretations?

How many more years shall it be before Masonic War is Peace psychologists and psychiatrists cognitively become aware of the factual reality that (a) the earth is not flat; (b) Earths resources are not infinite; (c) procreating and consuming above ecological carrying capacity limits results in resource conflict; and consequently psychological and psycho-social conflict over natural resources; (d) in order to reduce or eliminate the psychological effects of resource conflict; it is necessary to confront and eliminate the root breeding/consumption causes of resource conflict.

Conclusion: In the absence of Masonic War is Peace military health officials confronting the root breeding/consumption war causes of resource conflict; efforts such as the DCoE's Mental Health challenge appears to be nothing more than a bullshit the public relations image management

campaign of 'Lets pretend we give a fuck about soldiers mental health while doing sweet fuck all about the root -- breeding & consumption war -- causes of -- military, economic, cultural, religious, racial, cultural, psychological -- resource war conflict".

Gen Martin Dempsey & Gen Mulholland:

CivPsych Response to USASOC: DCoE Psych Health & TBI Challenge EoP options

There has been no buck stops here response from any civilian psychological association or individual psychologist or psychiatrist contacted (a) contradicting the EoP conclusion with supporting evidence; or (b) asking what they could do to help Military Health Officials to educate all the worlds citizens, organizations and corporations about the [ecological tipping points](#)⁵³ national security [military necessity](#)⁵⁴ of confronting the root breeding/consumption war causes of resource conflict and [cooperating](#)⁵⁵ to implement an [Ecology of Peace international law social contract](#)⁵⁶.

Presumably their ‘fuck honour’ civilian response is motivated by some form of closet ‘academic liberal’ fundamentalist belief that (i) poor fragile ego niggers, crackers, spicks, kaffirs, chinks, japs, kikes etc do not deserve buck stops here in your face constructive criticism feedback in village idiot simple justice language; about their ‘factphobia’ flat earth cultures and religions; and/or breed like cockroaches on Viagra because they are psychologically, biologically or religio-culturally inferior; and (ii) rich fragile ego niggers, crackers, spicks, kaffirs, chinks, japs, kikes etc do not deserve constructive criticism feedback in your face constructive criticism feedback in village idiot simple justice language; about their ‘factphobia’ flat earth economic growth cultures and dollar worship religions; and/or consume like bling niggers on crack because they are psychologically, biologically or religio-culturally inferior [[EoP option: Amend EoP PoW treaty](#)⁵⁷: Race Relations Experts [PDF](#)⁵⁸]; and they have fuck all interest in supporting Ecology of Peace military and political officials to [implement an Ecology of Peace referendum](#)⁵⁹.

None of these fragile ego corporate cocksucking academic liberals appear to give a fuck about ‘buck stops here’ communication practices. Consequently their ‘fuck honour’ response can be summarized as: Fuck any military or civilian who give a fuck about problem solving the Masonic ‘right to breed / consume’ with fuck all regard for ecological carrying capacity’ roots of racial, religions, class and cultural resource conflict.

If any of these fragile ego corporate cocksucking academic liberals are credible psychological scientists; they would not accuse anyone of being legally ‘crazy’ or ‘insane’; without (a) a crystal fucking clear scientifically verifiable legal definition of ‘insanity’ or ‘mental disorder’; (b) beyond reasonable doubt evidence in support of facts proving their allegation; if you stuck a gun to their heads. But such good corporate cocksuckers they are; you don’t even need to stick a gun to

Clarification of Terms:

EoP Conclusion:

In the absence of Masonic War is Peace military health officials confronting the root breeding/consumption war causes of resource conflict; efforts such as the DCoE's Mental Health challenge appears to be nothing more than a bullshit the public relations image management campaign of 'Lets pretend we give a fuck about soldiers mental health while doing sweet fuck all about the root -- breeding & consumption war -- causes of -- military, economic, cultural, religious, racial, cultural, psychological -- resource war conflict'.

Conditional EoP cooperator⁶⁰ definition of National Security:

Prior to Ecology of Peace international law social contract; an Ecology of Peace definition of National Security is 'the necessity of individuals concerned about (A) protecting and conserving natural resources return to sustainable local and national carrying capacity limits; and the resolution of national and international inter-cultural resource war conflict; to unconditionally or conditionally cooperate to (B) implement an Ecology of Peace international law social contract that (a) requires all the worlds citizens to breed and consume below ecological carrying capacity limits; (b) provides for a tribunal investigative body to adjudicate whereby nations who consume and/or procreate above their carrying capacity limits are notified to (i) justify and/or apologize and cease and desist; or (ii) if they refuse; all other nations are obliged to co-operate to remove the offending nation's scarcity combatant breeding/consumption cheaters from the planetary genepool.'

Subsequent to the achievement of an Ecology of Peace international law social contract would define national security as 'the necessity of individuals, families and nation states to unconditionally co-operate to (A) protect the Ecology of Peace social contract to sustainably protect and conserve natural resources in accordance to local and national carrying capacity limits and restrict national and international inter-cultural resource war conflict; (B) requires individuals, families, tribes and nations to (a) monitor other individuals, tribes, or nation's procreation and consumption behaviours to verify they are breeding and/or consuming below ecological carrying capacity limits; (b) report scarcity combatant violators to appropriate local or international authorities; and (c) where local or international authorities find any individual, tribe or nation to have been notified of their transgressions and refuse to justify or apologize and cease and desist; to co-operate to remove the offending individual, tribe or nation's scarcity combatant breeding/consumption cheaters from the planetary genepool.'

Buck Stops Here:

The following story is a good description of what I refer to as 'buck stops here' terms. It was told to me by my friend and at the time lover Gunny Dye; 17 year former US Marine Gunnery Sgt. Jon Michael Dye. He may have embellished it a bit, but I don't imagine too much; cause he was not afraid to say what he thought, when he thought it; and I may have unconsciously embellished it a bit with faulty memory.

⁶⁰ <http://tygae.weebly.com/eop-supporters.html>

He was in the Congo when he got a message that his ex-wife had been severely beaten up by her new boyfriend: broken ribs, that kind of thing. He got time off, and flew back to California. He found the boyfriend, and beat him to a pulp; broke ribs, bones, put the man into intensive care, and very close to death. The man filed assault charges. Gunny went to court. This is what he told the Judge.

'Your honour. I plead not guilty; although I do admit to having beat the shit out of that piece of scum, and put him in hospital. He beat up my wife, and I taught him a lesson about what happens to any man who – without any reasonable justification – assaults a woman; in this case, my former wife. To save the plaintiff, prosecutor and courts time: let me make it very clear. If he ever lays his hands on my former wife, again, the next time I will not be beating him up, but will put a bullet through his brain. If the plaintiff, prosecutor or court has any objections to that statement of intent, which is not a threat, but a Semper Fidelis promise; then you better find me guilty right now of first degree murder; and to save the State of California's time; schedule the execution date; and a few of my Marine Corp buddies can line me and the piece of scum plaintiff up against a wall and riddle us with bullets; and you won't have to bother the courts time with either of us ever again.

The Judge asked the plaintiff and prosecutor if they had heard the statement of the accused, and whether they fully understood the intentions of the accused, should his wife ever be beaten up again by the plaintiff; and whether they had any objections to the accused's promise of death consequences to the plaintiff for beating up his wife. Neither the plaintiff nor the prosecutor informed the judge of any objections.

Gunny was found not guilty of assaulting the plaintiff.

Now that is a judge who is capable of managing a 'buck stops here' courtroom, who when confronted with a 'don't fuck with me or my wife buck stops here' accused in his courtroom; was capable of demanding that the prosecutor and plaintiff understand that they were dealing with a 'don't fuck with me or my wife buck stops here' accused; and not some 'plausible deniable backstabbing two faced hypocrite mindfuck' accused; and save the court and police's time, by engaging in a problem solving fully informed consent 100%-certainty-agreement between the accused and plaintiff.

Mary-Jayne Rust:

I doubt you give a flying fuck about my efforts; but in your culture it is 'good manners' to pretend you give a fuck; to enhance your delusions about your image and personal identity bullshit beliefs about who you are, what you are doing; and why.

I am not a member of your 'Lets pretend I give a fuck about the environment; while doing sweet fuck all about the root Masonic – right to breed and consume with total disregard for ecological carrying capacity limits – social contract causes of environmental destruction' Masonic War is Peace culture.

In my Ecology of Peace culture: In Your Face brutal honesty – the truth, the whole truth and nothing but the goddamn truth 24/07/365 -- is not only goddamn good manners, it is honour and respect; the epitome of responsible freedom mental health; not to mention the only means by which any problem can be confronted so that it can be solved.

As per your request: You shall be removed to continue to enjoy your 'Lets pretend I give a fuck about the environment; while doing sweet fuck all about the root Masonic – right to breed and consume with total disregard for ecological carrying capacity limits – social contract causes of environmental destruction' Masonic War is Peace slavery freedumb.

My apologies for bothering you with my Ecology of Peace honour manners.

RE: Possible EoP MilNec Psychotronic response to USASOC: DCoE Psych Health & TBI Challenge

For the Record: If you had read the most recent correspondence you would have known it was legal correspondence. As noted at [Ecology of Peace legal submissions](#)⁷³, Ecology of Peace arguments and evidence are not welcome in most Masonic courts.

However should there one day be a Masonic court; or Masonic culture opponents interested in justice based upon Ecological Reality Facts rule of law; as opposed to Masonic Rule of Man Justice; and should such court be in the United States; the following would apply regarding electronic service notification of individuals relevant to the legal proceedings.

Electronic Service per email to a US citizen is lawful in terms of (I) the South African Electronic Communications and Transactions Act. 2002 (Act No. 25 of 2002) and (II) Federal Rules of Civil Procedure Rule 4(f) which allows for service “by other means not prohibited by international agreement as directed by the court,” as implemented in *Rio Properties, Inc. v. Rio Intern. Interlink*, 284 F.3d 1007 (9th Cir. 2002) which established that e-mail was an effective means of communication between parties, and that messages sent to the respondents would serve the purposes of notifying them of the pending litigation. Moreover, there is no indication that service in this manner would contravene any international agreement. Finally courts “have upheld service via e-mail, [in] cases involving e-mail addresses undisputedly connected to the defendants and that the defendants used for business purposes.” (*Ehrenfeld v. Bin Mufouz*, 2005 WL 696769 (S.D.N.Y., March 23, 2005))

Put simply maybe one day we find an impartial court of Masonic Judges capable of hearing constructive Ecology of Peace culture arguments and evidence criticism about the fuck up that is their Masonic War is Peace cult social contract religion; irrespective of whether Timothy McVeigh, Vladimir Putin and Lara Johnstone are the only village idiots on the planet who have such heretical Ecology of Peace anti-masonic beliefs, or whether there are only a handful of people on the planet who support our heretical anti-masonic beliefs. Maybe we find such a court; maybe not. We shall have to wait and see.

Lara Zhivago:

"William Manchester, author and U.S. Marine veteran of World War II, felt remorse and shame after his close-range personal killing of a Japanese soldier. "I can remember," he wrote, "whispering foolishly, 'I'm sorry' and then just throwing up ... I threw up all over myself. It was a betrayal of what I'd been taught since a child." Other combat veterans tell of the emotional responses associated with a close-range kill that echo Manchester's horror. The media's depiction of violence tries to tell us that men can easily throw off the moral inhibitions of a lifetime — and whatever other instinctive restraint exists — and kill casually and guiltlessly in combat. The men who have killed, and who will talk about it, tell a different tale."

-- Lt Col Dave Grossman, On Killing

"And then a shell lands behind us, and another over to the side, and by this time we're scurrying and the sarge and I and another guy wind up behind a wall. The sergeant said it was an .88 and then he said, "S and s some more." I asked him if he was hit and he sort of smiled and said no, he had just pissed his pants. He always pissed them, he said, just when things started and then he was okay. He wasn't making any apologies either, and then I realized something wasn't quite right with me, either. There was something warm down there and it seemed to be running down my leg. I felt, and it wasn't blood. It was piss. I told the sarge, I said, "Sarge, I've pissed too," or something like that and he grinned and said, "Welcome to the war." "

— World War II veteran; quoted in Barry Broadfoot, Six Year War, 1939-1945

"To understand the intensity of the body's physiological response to the stress of combat we must understand the mobilization of resources caused by the body's sympathetic nervous system, and then we must understand the impact of the body's parasympathetic backlash response.

The sympathetic nervous system mobilizes and directs the body's energy resources for action. The parasympathetic system is responsible for the body's digestive and recuperative processes.

Usually these two systems sustain a general balance between their demands upon the body's resources, but during extremely stressful circumstances the fight-or-flight response kicks in and the sympathetic nervous system mobilizes all available energy for survival. In combat this very often results in nonessential activities such as digestion, bladder control, and sphincter control being completely shut down. This process is so intense that soldiers very often suffer stress diarrhea, and it is not at all uncommon for them to urinate and defecate in their pants as the body literally "blows its ballast" in an attempt to provide all the energy resources required to ensure its survival."

-- Lt Col Dave Grossman, On Killing

*~~~~~**~~~~~*

Killing requires training because there is a built-in aversion to killing one's own kind. I can best illustrate this from drawing on my own work in studying killing in the military.

We all know that you can't have an argument or a discussion with a frightened or angry human being. Vasoconstriction, the narrowing of the blood vessels, has literally closed down the forebrain--that great gob of gray matter that makes you a human being and distinguishes you from a dog. When those neurons close down, the midbrain takes over and your thought processes and reflexes are indistinguishable from your dog's. If you've worked with animals, you have some understanding in the realm of midbrain responses.

Within the midbrain there is a powerful, God-given resistance to killing your own kind. Every species, with a few exceptions, has a hardwired resistance to killing its own kind in territorial and mating battles. When animals with antlers and horns fight one another, they head butt in a harmless fashion. But when they fight any other species, they go to the side to gut and gore. Piranhas will turn their fangs on anything, but they fight one another with flicks of the tail. Rattlesnakes will bite anything, but they wrestle one another. Almost every species has this hardwired resistance to killing its own kind.

During World War II, US Army Brig. Gen. S. L. A. Marshall had a team of researchers study what soldiers did in battle. For the first time in history, they asked individual soldiers what they did in battle. They discovered that only 15 to 20 percent of the individual riflemen could bring themselves to fire at an exposed enemy soldier.

That is the reality of the battlefield. Only a small percentage of soldiers are able and willing to participate. Men are willing to die, they are willing to sacrifice themselves for their nation; but they are not willing to kill. It is a phenomenal insight into human nature; but when the military became aware of that, they systematically went about the process of trying to fix this "problem." From the military perspective, a 15 percent firing rate among riflemen is like a 15 percent literacy rate among librarians. And fix it the military did. By the Korean War, around 55 percent of the soldiers were willing to fire to kill. And by Vietnam, the rate rose to over 90 percent.

An examination of the psychological effects of combat must begin by acknowledging that there are some positive aspects to combat. Throughout recorded history these positive aspects have been emphasized and exaggerated in order to protect the self-image of combatants, or honor the memory of the fallen and rationalize their deaths, to aggrandize and glorify political leaders and military commanders, and to manipulate populations into supporting war and sending their sons to their deaths. But the fact that these positive aspects have been manipulated and exploited does not deny their existence. There is a reason for the powerful attraction of combat over the centuries, and there is no value in going from the dysfunctional extreme of glorifying war to the equally dysfunctional extreme of denying its attraction.

The ability to recognize and confront danger, the powerful group bonding that occurs in times of stress, the awe-inspiring spectacle of a nation focused and aligned to achieve a single aim, selfless dedication to abstract concepts and goals, and the ability to overcome the powerful imperatives of the survival instinct and willingly die for others: these common aspects of war represent both important survival traits and a potentially positive comment on basic human nature. But if war does have a capacity for reflecting some usually hidden, positive aspects of humanity, it irrefutably does so at a great and tragic cost.

One obvious and tragic price of war is the toll of death and destruction. But there is an additional cost, a psychological cost borne by the survivors of combat, and a full understanding of this cost has been too long repressed by a legacy of self-deception and intentional misrepresentation. After peeling away this "legacy of lies" that has perpetuated and glorified warfare there is no escaping the conclusion that combat, and the killing that lies at the heart of combat, is an extraordinarily traumatic and psychologically costly endeavor that profoundly impacts all who participate in it.

[...] A Cultural Conspiracy

It is essential to acknowledge that good ends have been and will continue to be accomplished through combat. Many democracies owe their very existence to successful combat. .. And around the world the price of civilization is paid every day by military units on peacekeeping operations and domestic police forces who are forced to engage in close combat. There have been and will continue to be times and places where combat is unavoidable, but when a society requires its police and armed forces to participate in combat it is essential to fully comprehend the magnitude of the inevitable psychological toll.

It is often said that "All's fair in love and war," and this expression provides a valuable insight into the human psyche, since these twin, taboo fields of sexuality and aggression represent the two realms in which most individuals will consistently deceive both themselves and others. Our psychological and societal inability to confront the truth about the effects of combat is the foundation for the cultural conspiracy of repression, a deception and denial that has helped to perpetuate and propagate war throughout recorded history.

In the field of developmental psychology a mature adult is sometimes defined as someone who has attained a degree of insight and self-control in the two areas of sexuality and aggression. This is also a useful definition of maturity in civilizations. Thus two important and reassuring trends in recent years have been the development of the science of human sexuality, which has been termed "sexology," and a parallel development of the science of human aggression, which D. Grossman has termed "killology." There is universal consensus that continued research in this previously taboo realm of human aggression is vital to the future development, and perhaps to the very existence, of our civilization.

So far South African and/or International prosecutors, lawyers, magistrates, judges, politicians and Oklahoma City bombing prosecutors and counsel refuse to confirm with President Bush and/or Governor Gray Davis that Timothy McVeigh's execution was faked; so I have been unable to find out whether the terms of his faked execution allow for me to physically spend two years with Timothy McVeigh off grid in a little village in the Siberian wilderness; before we depart this planet together.

Arena, Coliseum or Amphitheatre:

An Arena is defined as 1. the oval space in the center of a Roman amphitheater for gladiatorial combats or other performances. 2. a central stage, ring, area, or the like, used for sports or other forms of entertainment, surrounded by seats for spectators: a boxing arena; a circus arena; a debating arena.

Masonic War is Peace Divide and Conquer: Political False Right/Left Gladiator Arena:

A good analysis of the Masonic War is Peace [False Left Right paradigm](#) is found in [The Obama Deception](#). It describes Left/Right wing politics as similar to that of a WWF wrestling match. The left and right wing wrestlers/politicians are Judas Goat members of the same Masonic Orders who pretend to give each other slamdunk punches; to distract and manipulate the blood lust emotions of their respective 'us vs them' 'its our right to breed/consume like bling niggers on crack/breed like cockcroaches on viagra' followers; like Pied Pipers or Judas Goats leading their corporate and individual welfare farm rats to the economic taxfarm shearing and military cannon fodder slaughterhouses.

Masonic War is Peace Divide and Conquer the Races Prison Gladiator Arena:

[The Making of Bonecrusher](#) describes how Prison Guards at Corcoran State Prison setup a gladiator arena; where they did not allow prisoners held in administrative segregation to go out onto the yard into the sunlight; unless those prisoners were willing to engage in gladiator fights with other selected gladiator prisoners. The guards would then place bets on which gladiator prisoner would win. Some of the guards shot prisoners if they refused to fight; or simply for profit and sport; like American dentists shoot Zimbabwe lions.

Man in the Arena, Invictus, If:

The Man in the Arena is a well known paragraph of Theodore Roosevelt's *Citizenship in a Republic* speech at the Sorbonne in Paris, France on 23 April 1910.

It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, who comes short again and again, because there is no effort without error and shortcoming; but who does actually strive to do the deeds; who knows great enthusiasms, the great devotions; who spends himself in a worthy cause; who at the best knows in the end the triumph of high achievement, and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who neither know victory nor defeat.

The *Man in the Arena* passage was quoted by US president, Richard Nixon, both in his victory speech on November 6, 1968, and in his resignation address to the nation on August 8, 1974: "Sometimes I have succeeded and sometimes I have failed, but always I have taken heart from what Theodore Roosevelt once said about the man in the arena, 'whose face is marred by dust and sweat and blood, [...]"

Nelson Mandela gave a copy of the *Man in the Arena* passage to François Pienaar, captain of the South African rugby team, before the start of the 1995 Rugby World Cup, in which the South African side eventually defeated the heavily favoured All Blacks of New Zealand. In *Invictus*, the film based on those events, the poem "Invictus" is used instead.

Along with British Nobel laureate Rudyard Kipling's "If—", they psycho-socially represent the idea of Victorian-era stoicism—the "stiff upper lip" self-discipline, which popular culture rendered into a British national virtue and alleged character trait.

"If—" was initially published in the "Brother Square Toes" chapter of the book *Rewards and Fairies*. In his posthumously published autobiography *Something of Myself*, Kipling said that his poetic inspiration for the poem was the military actions of Leander Starr Jameson, leader of the failed Jameson Raid against the Transvaal Republic to overthrow the Boer Government of Paul Kruger some 15 years prior to its publication. The failure of that mercenary coup d'état aggravated the political tensions between Great Britain and the Boers, which led to the 1899-1902 Second Boer War.

Abraham Simpson quotes the poem to his son Homer in *The Simpsons* second season episode "Old Money". Homer responds to the line "You'll be a man, my son" by saying, "You'll be a bonehead!"

Sexology, Killology: Civilized Maturity: Honour & Honest Problem Solving; or Parasite Hypocrisy Misery Profiteering:

Lt Col Dave Grossman "In the field of developmental psychology a mature adult is sometimes defined as someone who has attained a degree of insight and self-control in the two areas of sexuality and aggression. This is also a useful definition of maturity in civilizations."

----- Lt. Col Dave Grossman: Sexology & Killology -----

Killing requires training because there is a built-in aversion to killing one's own kind. I can best illustrate this from drawing on my own work in studying killing in the military.

We all know that you can't have an argument or a discussion with a frightened or angry human being. Vasoconstriction, the narrowing of the blood vessels, has literally closed down the forebrain--that great gob of gray matter that makes you a human being and distinguishes you from a dog. When those neurons close down, the midbrain takes over and your thought processes and reflexes are indistinguishable from your dog's. If you've worked with animals, you have some understanding in the realm of midbrain responses.

Within the midbrain there is a powerful, God-given resistance to killing your own kind. Every species, with a few exceptions, has a hardwired resistance to killing its own kind in territorial and mating battles. When animals with antlers and horns fight one another, they head butt in a harmless fashion. But when they fight any other species, they go to the side to gut and gore. Piranhas will turn their fangs on anything, but they fight one another with flicks of the tail. Rattlesnakes will bite anything, but they wrestle one another. Almost every species has this hardwired resistance to killing its own kind.

During World War II, US Army Brig. Gen. S. L. A. Marshall had a team of researchers study what soldiers did in battle. For the first time in history, they asked individual soldiers what they did in battle. They discovered that only 15 to 20 percent of the individual riflemen could bring themselves to fire at an exposed enemy soldier.

That is the reality of the battlefield. Only a small percentage of soldiers are able and willing to participate. Men are willing to die, they are willing to sacrifice themselves for their nation; but they are not willing to kill. It is a phenomenal insight into human nature; but when the military became aware of that, they systematically went about the process of trying to fix this "problem." From the military perspective, a 15 percent firing rate among riflemen is like a 15 percent literacy rate among librarians. And fix it the military did. By the Korean War, around 55 percent of the soldiers were willing to fire to kill. And by Vietnam, the rate rose to over 90 percent.

An examination of the psychological effects of combat must begin by acknowledging that there are some positive aspects to combat. Throughout recorded history these positive aspects have been emphasized and exaggerated in order to protect the self-image of combatants, or honor the memory of the fallen and rationalize their deaths, to aggrandize and glorify political leaders and military commanders, and to manipulate populations into supporting war and sending their sons to their deaths. But the fact that these positive aspects have been manipulated and exploited does not deny their existence. There is a reason for the powerful attraction of combat over the centuries, and there is no value in going from the dysfunctional extreme of glorifying war to the equally dysfunctional extreme of denying its attraction.

The ability to recognize and confront danger, the powerful group bonding that occurs in times of stress, the awe-inspiring spectacle of a nation focused and aligned to achieve a single aim, selfless dedication to abstract concepts and goals, and the ability to overcome the powerful imperatives of the survival instinct and willingly die for others: these common aspects of war represent both important survival traits and a potentially positive comment on basic human nature. But if war does have a capacity for reflecting some usually hidden, positive aspects of humanity, it irrefutably does so at a great and tragic cost.

One obvious and tragic price of war is the toll of death and destruction. But there is an additional cost, a psychological cost borne by the survivors of combat, and a full understanding of this cost has been too long repressed by a legacy of self-deception and intentional misrepresentation. After peeling away this "legacy of lies" that has perpetuated and glorified warfare there is no escaping the conclusion that combat, and the killing that lies at the heart of combat, is an extraordinarily traumatic and psychologically costly endeavor that profoundly impacts all who participate in it.

[...] A Cultural Conspiracy

It is essential to acknowledge that good ends have been and will continue to be accomplished through combat. Many democracies owe their very existence to successful combat. ... And around the world the price of civilization is paid every day by military units on peacekeeping operations and domestic police forces who are forced to engage in close combat. There have been and will continue to be times and places where combat is unavoidable, but when a society requires its police and armed forces to participate in combat it is essential to fully comprehend the magnitude of the inevitable psychological toll.

It is often said that "All's fair in love and war," and this expression provides a valuable insight into the human psyche, since these twin, taboo fields of sexuality and aggression represent the two realms in which most individuals will consistently deceive both themselves and others. Our psychological and societal inability to confront the truth about the effects of combat is the foundation for the cultural conspiracy of repression, a deception and denial that has helped to perpetuate and propagate war throughout recorded history.

In the field of developmental psychology a mature adult is sometimes defined as someone who has attained a degree of insight and self-control in the two areas of sexuality and aggression. This is also a useful definition of maturity in civilizations. Thus two important and reassuring trends in recent years have been the development of the science of human sexuality, which has been termed "sexology," and a parallel development of the science of human aggression, which D. Grossman has termed "killology." There is universal consensus that continued research in this previously taboo realm of human aggression is vital to the future development, and perhaps to the very existence, of our civilization.

If that is true: would civilized individuals; i.e. those who have attained a degree of insight and self control over their sexuality and aggression; where 'insight' and 'self-control' would include sincerity about fully informed consent problem solving:

- clearly and succinctly non-violently educate other uncivilized cultures that unrestrained (i) physical sexuality that results in procreation of beings above ecological carrying capacity limits; (ii) economic ego-materialist sexuality [i.e. efforts to market yourself as worthy as fuckable] that results in consumerism and consumption above ecological carrying capacity limits; are the direct causes of population pressure » resource depletion » resource scarcity » resource war » economic, political, religious, cultural, military and legal aggression.

or

- suppress the information that unrestrained (i) physical sexuality that results in procreation of beings above ecological carrying capacity limits; (ii) economic ego-materialist sexuality [i.e. efforts to market yourself as worthy as fuckable] that results in consumerism and consumption above ecological carrying capacity limits; are the direct causes of population pressure » resource depletion » resource scarcity » resource war » economic, political, religious, cultural, military and legal aggression;

because for example – they believe that it is their right – as 'men' – to fuck and fornicate and breed unwanted children into human factory farming slavery

and instead: deliberately, consciously and fraudulently:

- passive aggressively via divide and conquer propaganda and disinformation educate their own alleged 'civilized' culture tribes and other alleged uncivilized culture tribes to deliberately encourage the 'god given belief right to' unrestrained (i) physical sexuality that results in procreation of beings above ecological carrying capacity limits; (ii) economic ego-materialist sexuality [i.e. efforts to market yourself as worthy as fuckable] that results in consumerism and consumption above ecological carrying capacity limits; knowing that such activities would result in population pressure » resource depletion » resource scarcity » resource war » economic, political, religious, cultural, military and legal aggression; which they could socio-politically, economically, psychologically, legally or militarily profit from?

Radical Honesty liberation of PC colonized Mind: Non-violent Fanon 'colonized' mind liberation by verbal or shocking violence on the rotting mind of the colonizer (pc civilized settler):

Fanon: "To shoot down a white man is to kill two birds with one stone, to destroy an oppressor and the man he oppresses at the same time" – Jean Paul Sartre (Preface to Frantz Fanon's Wretched of the Earth):

Frantz Fanon (July 20, 1925 – December 6, 1961) was a Martinique-born French psychiatrist, philosopher, revolutionary and writer whose work is influential in the fields of post-colonial studies, critical theory and Marxism. Fanon was known as a radical existential humanist thinker on the issue of decolonization and the psychopathology of colonization.

Fanon is the author of ***The Wretched of the Earth: The Handbook for Black Liberation***, which argued that colonialism is a system of systemic structural violence which eventually triggers a violent reaction. In his view the violent nature of that reaction is tragic but cathartic. Its catharsis lies in its ability to dissolve the inferiority complex of the colonised and to release the tension which has been inscribed in the body during a lifetime of oppression. The liberation of the Africans 'colonized mind' requires him to enact violence upon the rotting corpses of the settlers. Colonialism, he argues, creates in the native a perpetual tendency toward violence, a "tonicity of muscles" which is deprived of an outlet. Hence, the phenomena of "Niggers Killing Niggers on Saturday Night."

True liberation for Fanon could only be achieved through violence. False liberation, occurs where "freedom" is granted or ceded by those in power, such as by the Apartheid regime. For Africans to be truly free, Fanon said they must liberate themselves by violence. In the

absence of the native's colonized mind being liberated by physical violence (thereby overcoming his psychological masculine insecurities), on the rotting corpse of the settler; he would never be liberated. The relevance of language and the reformation of discourse pervades much of his work, which is why it is so interdisciplinary, spanning psychiatric concerns to encompass politics, sociology, anthropology, linguistics and literature. *Wretched of the Earth* provides an analysis of the psychology of the native: or as Fanon refers to the 'colonized mind' and how liberation can only occur by means of "violence on the rotting corpse of the settler". *Wretched of the Earth* had a major impact on the anti-colonialism and black-consciousness movements around the world.

Frantz Fanon thinking inspired among others Mandela's 1962 speech: *A Land Ruled by the Gun* and 'liberation struggle' and his Nobel Peace Prize "wretched of the earth" acceptance speech, Steve Biko's concepts of Black Consciousness, and President Barack Obama. Fanon currently inspires Rhodes University and the KwaZulu-Natal Church Land Programme's: Land Question.

Radical Honesty: To Gunnery Sgt. honestly (sometimes by shouting or verbally violent or shocking language/ideas) expose whiteness (political correctness, two faced hypocrisy, bullshit the public relations) is to kill two Goliath colonized minds with the pebble of honesty/reality, to destroy the political correct cultural meme-plex oppressor's PR illusion and the fragile ego's who invite 'whiteness' (political correctness, two faced hypocrisy, bullshit the public relations) into their minds and relationships with others, to 'be liked', to be 'civilized', to avoid being a 'savage'.

In Radical Honesty we consider 'colonized minds', to be minds that have discarded authenticity, brutal honesty and sincerity. Mind 'colonized' by 'politically correct' 'civilized' 'Bullshit the Public Relations' Image management memeplexes; hence Nelson Mandela's Bullshit-the-Public political correctness is far more 'colonialist' than Hendrik Verwoerd's brutal honesty, ever was.

But First: Cartesian vs. Radical Honesty Thinking: In cultures who have adopted western 'I' conceptual thinking, based upon Descartes "I think, therefore I am" principles, they consider their 'thoughts' to be 'I'. Any thought that enters their consciousness, they think 'I think/thought ... '.

Radical Honesty Thinking is based upon Eastern 'observation of the mind' principle's, which consider the being to be 'I', not the mind: 'I am, therefore I think'. Hence our sensate being: legs, bodies, sensations (sweaty palms, aches, tight chest, etc) are 'I' (our identity), whereas the thoughts that pass through our consciousness are not 'I'. We notice the thoughts entering into our consciousness, in the same way, you may listen to a radio discussion or debate, where different, frequently contradictory ideas are expressed. You listen, and don't think 'I think that' simply because the thought entered your consciousness. They are just sounds, that are converted into thoughts by your conscious mind; you can agree, disagree, but they are not 'I'.

As Susan Blackmore explains in her article about how Memeplexes hijack our minds, by acting no different to Selfish Genes, in *Waking from the Meme Dream*: "The most obvious (and scary) conclusion from modern neuroscience is that there is simply no one inside the brain. The more we learn about the way the brain functions the less it seems to need a central controller, a little person inside, a decider of decisions or an experiencer of experiences. These

are just fictions - part of the story the brain tells itself about a self within (Churchland and Sejnowski, 1992; Dennett, 1991).”

If it is true that the National Security Agency (Covert Operations of the National Security Agency) and Kremlin (Psychotronic War and the Future of Russia) can read people’s minds, and transmit ideas into people’s minds; then a Cartesian mind, would react to such a transmission, with ‘I thought .. .’; whereas a Futilitarian would notice the thought, as simply a message, an idea. If interesting, worthy of consideration or investigation, and if not, to ignore and focus their attention elsewhere. If interesting, they could investigate whether it was possible for any earthly or non-earthly entity to transmit thoughts. Of course, if you wanted the receiver of such a transmitted message, to share it, it would help to find someone, who (a) was not interested in power, and (b) didn’t give a fuck about their politically correct reputation!

In Radical Honesty culture our process of practicing radical honesty – expressing our being’s specific anger or appreciations, no matter how idiotic or absurd, face to face - is our constant ‘uncivilized/uncolonized’ liberation generator, by not allowing our minds/consciousness to be colonized by meme-plexes that require us to abandon being true to ourselves, being authentic, sincere and brutally honest in our relationships, to be colonized by ‘politically correct’ ‘civilized’ ‘Bullshit the Public Relations’ Image management meme-plexes. Put differently, practicing radical honesty, acts as a continuous, never-ending Mad Max exterminator of the political correct/Bullshit the public relations meme’s which are constantly fighting a battle to colonize our beings, and make us ‘civilized colonized slaves’, to their PR bullshit.

The Process of ‘Practicing Radical Honesty’ serves to kill not only the incoming PC memeplex, but also any guerrilla PC memeplexes hiding themselves in other MemePlexes (religion, culture, etc)

The PC memeplex desires to colonize your/my mind by getting us to suppress our true selves, our honest opinions, by consciously or unconsciously (culture and religious masculine insecurity doctrine carried over from centuries of masculine insecure male leaders who had little appreciation for honesty, and demanded sycophancy and blind obedience to their opinions and religious edicts) suppressing you/our true self/selves, in order to be 'civilized', where those who refuse to suppress their true selves, who still display any spontaneous, sincere, authentic anger, love, joy or any behaviour that they consider 'should be suppressed' are considered as 'uncivilized'.

Note: We do not endorse ‘drive by verbal violence’ or passive aggressive avoidance poor me victim pity parties; you express your anger and appreciations, face to face, and remain in the disagreement, for as long as it takes, until it is totally resolved.

As stated, by Brad Blanton, in *Practicing Radical Honesty*:

Many of us are concerned about fairness and use the principle of fairness as our primary rationalization for withholding anger. Advanced instruction in this principle creates lawyers who are miserable people. Divorces handled by lawyers often result in children shot back and forth like missiles between hostile camps. If you force yourself to be fair while still angry, you are a fool, and any agreements you make in such a state won't work for you. Judges and lawyers ignore this fact. Judges and lawyers exist for people who can't handle their anger. A judge tells you what to do, based on what he or she thinks is fair, whether you like it or not, because you haven't been able to work things out on your own.

There is a better way to fight that turns out to be equitable in the long run, even though it may look uncivilized and unfair in the beginning. It might not seem fair to express what seems like intense resentment for petty reasons in the beginning, but the advantages become clear by the time the argument is over.

Things turn out fairly when, and only when, people get over being angry. The result of experimenting with this kind of interaction is very dramatic.

The major benefit of expressing your anger completely to someone is that, afterward, you can forgive him or her. The reason for forgiving your enemies is not for their benefit but for your own benefit. Holding grudges against other people doesn't hurt them; it doesn't even bother them much—in fact, it even pleases them if they are still mad at you. It's not in your enlightened self interest to hold grudges, regardless of whether it bothers the person you hate or not. Unless you develop the capacity to do what it takes to forgive other people, you can't tell your story from reality, you can't forgive yourself, and you stay trapped in moral condemnation in your mind.

----- Excerpt: Formal Apology: Fraud of Radical Honesty cult -----

I have become aware of information and evidence proving such information as accurate; that information which I submitted to you; suggesting quasi legal options for helping to resolve the USA v Timothy McVeigh -- Denver Oklahoma: Criminal Action No. 96-CR-68-M; US Court of Appeals: Tenth Circuit: No. 98-1247 -- charges against you; were erroneous / inaccurate.

More specifically and with greater clarity than the original 2001 letter:

In my 2001 letter to President G W Bush and yourself – subsequently deleted from my laptop by unknown individuals – I requested that Pres Bush give you a stay of execution; so that you could meet with the Oklahoma City bombing victims; in an alternative venue interested in the evidence; the whole evidence and nothing but the evidence. I suggested such an alternative venue to include the founder of Radical Honesty and Radical Honesty Trainers; to help facilitate honest forgiveness and truthseeking problem solving related to the causes of the OKC bombing and US foreign policy. Such alternative venue would provide OKC bombing victims and/or victims and/or critics of US foreign policy who were (a) angry with you; and/or (b) not being provided answers to their questions by the legal court proceedings; with the opportunity to (c) express their anger and get over their anger; and once so done; and/or (d) listen to your justifications. Once they had considered your Ecology of Peace evidence; they could determine whether your actions were objectively and/or subjectively legally (a) justified, and if so: acquit you and cooperate with you to address the root causes of OKC bombing; or (b) unjustified: and convict you and sentence you and me to death.

Errors:

My belief that Radical Honesty Founder: Brad Blanton and Radical Honesty Trainers would care deeply about helping to facilitate honest forgiveness and truthseeking problem solving of the -- Masonic War is Peace social contract causes of domestic militarization of police and foreign policy resource war -- causes of the OKC bombing; were incorrect. They are not sincere

about facilitating honest forgiveness and truthseeking problem solving of the causes of resource conflict; between members of their own little Radical Honesty cult; let alone being willing to facilitate honest forgiveness and truthseeking problem solving related to causes of resource conflict between their cult and other – ethnic, class or religious – cults.

Put simply: I don't think 'radical honesty forgiveness' procedures can work with insincere parasitic people.

If any 'radical honesty' cult members are sincere root cause problem solver truthseekers; after they have resolved their anger through 'radical honesty forgiveness' processes; they would be quite amenable to sincerely investigating the root causes of whatever it was that caused their social conflict; and would quickly conclude that the root cause of all religious, gender, class, and ethnic resource war conflict; is a Masonic War is Peace international law social contract that allows the worlds citizens the right to breed and consume without any regard for ecological carrying capacity limits; resulting in resource depletion and scarcity and religious, gender, class and ethnic resource war conflict. They would then agree to cooperate and support each other to determine whether it was possible to abolish the Masonic War is Peace social contract; and replace it with an Ecology of Peace international law social contract.

Well the radical honesty cult use those radical honesty forgiveness procedures and it ain't helped any of them to get over their anger and confront Ecology of Peace facts reality. That could mean either (a) radical honesty forgiveness procedures don't work; or (b) radical honest forgiveness procedures don't work on insincere people; who are only pretending to engage in the process of forgiveness to clean out their minds jail of beliefs; and confront Ecology of Peace Facts reality.

Ecology of Peace facts reality: 1. Earth is not flat; 2. Resources are finite; 3. When humans breed or consume above [ecological carrying capacity limits](#), it results in resource conflict; 4. To sustainably protect and conserve natural resources in accordance to local and national carrying capacity limits; and restrict [national and international inter-cultural resource war conflict](#); humans must implement an Ecology of Peace international law social contract that restricts all the worlds citizens to breed and consume below ecological carrying capacity limits.

I imagine individuals who are sincere about addressing the root causes of resource war conflict; may be quite capable of agreeing to Ecology of Peace facts reality; without having to go through any 'radical honesty forgiveness' process of venting their rage; or may have their own process of getting rid of their minds jail of beliefs. Quite simply some form of cultural military honour or scientific intellectual integrity; or religious old believers like conscience may be quite as capable of encouraging an individual to confront Ecology of Peace Facts reality; if not more so; than 'radical honesty forgiveness' procedures.

Corrections to 2001 letter to President G W Bush and yourself:

My current working hypothesis conclusion is that all that is absolutely necessary is for such an alternative venue would be (a) The 'Justice Quartus de Wet & Jury Percy Yutar mercy' guarantee prior to the start of proceedings; that if the Judge or Jury finds us guilty; the Judge shall agree to our EoP cultural mercy preference not to waste taxpayers funds as prisoners; but the opportunity for us to be granted a two year exile to live together somewhere quietly in a village in the Siberian or similar wilderness; before the Red Army execute us by firing squad and bury us together in unmarked graves in the Siberian wilderness; (b) The judge and jury's

commitment to the evidence; the whole evidence and nothing but the evidence; so that both Ecology of Peace and Masonic War is Peace parties could submit their evidence; for the Judge and/or Jury's consideration; (c) Once the Judge or Jury have considered all the Ecology of Peace and Masonic War is Peace evidence; if they determine that your Ecology of Peace actions were objectively and/or subjectively legally (i) justified, to acquit you; or (ii) unjustified: to convict you and sentence you and me – as your EoP Bram Fischer expert witness to the subjective reasonableness of your military necessity actions -- to death in Siberia; as per 'Justice Quartus de Wet & Jury Percy Yutar mercy' guarantee.

Fraud of Radical Honesty Cult:

As you are aware; at the time I was a member of the Radical Honesty culture; and sincerely believed that the founder and trainer members of the Radical Honesty culture were sincere about honestly resolving the root causes of – race, class, religion – social resource war conflict.

It has slowly become apparent to me that I was extremely naïve and that Dr. Blanton and his 'Radical Honesty' trainers are not remotely sincere about honestly resolving the root causes of – race, religion and class – resource war social conflict.

Awakening to Dr. Blanton's and Radical Honesty cultures fraud has been a slow process; such as waiting for him to notify South African courts that he wishes to withdraw his expert witness affidavits – as per [my discussion with Brad Blanton and Radical Honesty Trainers; after I filed an application with Norwegian Oslo court in the matter of Norway v Anders Breivik; on the issue of free and fair trials for everyone, white or black, rich or poor, right wing or left wing --](#) and the perjury reasons for his withdrawal of his expert witness affidavits.

Radical Honesty: 'Honour'; Cleaning Out Minds Jail of Beliefs:

I really believed that Brad Blanton was a sincere truthseeker; more specifically that he was sincere about (a) honour and that his definition of honour was based on honesty and a world where honour and honesty is rewarded with support from the radical honesty community; and (b) his 'jail of belief'; that if or when he was confronted with information that proved any of his working hypothesis conclusions about reality to be incorrect; he would 'clean out the trash belief' in his mind; and let everyone know he had cleaned out the trash belief in his mind; and replaced it with new more accurate working hypothesis conclusion.

I was profoundly affected to create this working hypothesis that was almost, if not; truly a belief in Brad's sincerity about honour and living honourably and honestly; by Brad. I remember sitting in a workshop and it was near the end of the workshop and Brad was sobbing like a baby; talking about radical honesty and honour; and that maybe he had not accomplished much or become a success according to conventional materialist principles of success; but he had no conscience problems; because he knew he had lived an honourable life; he had been nothing but brutally honest with people he loved and cared about and related to; he had not lied to them; he could depart this planet and know: I told the truth to people I cared about and worked with; irrespective of the consequences and I supported other truth tellers; and worked with them to create a world where honesty is rewarded.

It was one of the foundations for my willingness to risk so much to support him; to show him that I sincerely believed that he was sincere about the co-creation of a world where honour and honesty is rewarded with support from the radical honesty community. I would provide him

with such support; inform the world and people whom I thought may be interested in an honest and honourable world, about the work he was doing; so that they could cooperate and we could create a different world; where honesty and honour are rewarded.

I cannot tell you how many times he has regurgitated the importance of getting over the 'jail of belief'; that if or when he was confronted with information that proved any of his working hypothesis conclusions about reality to be incorrect; he would 'clean out the trash belief' in his mind; and let everyone know he had cleaned out the trash belief in his mind; and replace it with new more accurate working hypothesis conclusion. His books: Radical Honesty; and Practicing Radical Honesty; and his workshops deal with the issue over and over again.

I was wrong. My repeated efforts to inform Brad Blanton and his Radical Honesty trainers how and why I considered them to be engaged in fraud; giving them the opportunity to respond to me and clarify where or how I was in error; were ignored; except for Mike Lewinsky who responded that Radical Honesty is not about honour, making clear agreements, keeping those agreements; i.e. fully informed consenting agreements; Radical Honesty is about living without rules. Re Radical Honesty Honour:

I don't know if anyone else in the Radical Honesty cult actually ever considered Brad Blanton to be sincere about honour.

As noted in legal documentation filed on 17 October 2013; I no longer think that Brad Blanton or any Radical Honesty Trainers are or ever were sincere about honour.

Put simply I don't think Brad Blanton or Radical Honesty Trainers would be interested in making fully informed consenting agreements; about cooperating to make rules to live by that are based upon confronting ecological carrying capacity limits and fully informed consenting agreements; because they care about honourable living with their fellow cult members; let alone with members from other cultures, races and religions.

I doubt you'd get them to cooperate to make rules to live by that are based upon confronting ecological carrying capacity limits and fully informed consenting agreements; if you stuck a gun to their heads.

Two days ago a seven year old African child pointed a gun at my head. I was walking my dogs to the forest. When I crossed the road there were a few young African children playing. They followed me and the dogs and one called to get my attention. 'Aunty' he called. So I stopped and turned around. He was about seven and had a pistol in his hand which he pointed at my head. It appeared as if he was attempting to play child soldier and intimidate me in front of his fellow child soldiers. I asked him what he wanted and why he was pointing a gun at my head; and that he should be careful about pointing a gun at someone; cause some police officers don't care about whether you are a child, if you are pointing a gun at them or someone else; they simply shoot first and put a bullet through your brain and ask questions later. If you going to point a gun at someone's head; you better be willing to pull the trigger or apologize for pointing a gun at their head. He said 'sorry aunty; its just a pellet gun'; and stuck it into his trousers. It looked very much like a real pistol to me; but I didn't start an argument about whether his gun was real or not. I asked him about what his mother thought about him having a gun; and where she was. He was a twin. His mother was dead and he and his brother were living with his grandmother.

I don't have a gun to stick to anyone's head; but as overpopulation and overconsumption collides with declining resources; more and more people; including children; will be sticking guns to other people's -- including children's -- heads.

Re Radical Honesty Cleaning Out Minds Jail of Beliefs:

I don't know if anyone else in the Radical Honesty cult actually considered Brad Blanton to be sincere about cleaning out his mind's jail of fundamentalist beliefs.

I no longer think that Brad Blanton is or ever was sincere about cleaning out his minds jail of fundamentalist beliefs; and I don't think any Radical Honesty Trainers are or ever were sincere about cleaning out their minds jail of fundamentalist beliefs.

They say their primary reality is based on 'noticing'; but no matter how much information and evidence you provide Brad Blanton and his Radical Honesty cult trainers that the earth is not flat; that it is round and that its resources are finite; the more they refuse to include it in their 'noticing' about reality.

EoP Amicus Req; RE: WiP #16-MJ-00006: USA v A Bundy et al: Lavoy Finicum Bodycam Surveillance

Re: [Does Oregon State Police value wildlife over human life?](#) “The FBI stated yesterday that there was no body camera on any of the four state troopers involved in the January 26 shooting of Lavoy Finicum in the snow in Harney County. Coincidentally, the same day of the shooting the Oregon State Police released body cam footage of state troopers rolling over an elk stuck in the snow. Clearly the technology is there and was available. The question remains: If there was enough time to set up a tactical roadblock with at least one trooper flanking the roadblock in the trees, why wasn't there time to attach body cams to the troopers? Body cameras protect the police and the public. They are the best tool for government to dispel rumors regarding unjustified force. These questions must be answered and soon: Was there a decision made to not wear them, was it incompetence, or is there a reasonable answer out there? We need answers but why isn't the media asking these questions?”

I don't know what the Oregon State Police's legal definition is for 'wildlife' or 'human life'; or what their bodycams policy is or was; generally speaking or on 26 Jan 2016 in Harney and Grant Co.

I do know that if or when any American or foreign military intelligence agency – FSB, MI6 or Mossad – were monitoring or [psychotronically manipulating](#) any particular event; they have psychotronic bodycam footage of the event. Highly advanced psychotronic technology works similar; but far more advanced; than what is referred to as remote viewing [Remote Viewing Info: [Suspect Zero](#); Christine Hart: [News of the World & Feathermen](#); David Morehouse: [Psychic Warrior](#)].

Put simply; its very similar to an individual in charge of manipulating a drone; except that the drone is a human. So they are like a bodycam on the individual; but not only can they hear, see and record everything the person sees and hears; they can also know what the person is thinking about what they see and hear. They can record other bodily senses: heart rate, etc.

More information about psychotronic technology can be found in among others: EoP v WiP NWO negotiations: Intl Psychiatry & Psychology Orgs & Individuals [[PDF](#)]

12 July 2015: Lara and Tim work on EoP response to the American Psychological Association Hoffman Report:

On 12 July 2015 at 13:53 hrs Lara emailed the American Psychology Association Board of Directors and David Hoffman: Subject: Hoffman APA Review Report: Sincere Problem Solving focus; or Bullshit the Public Relations event?

The American Psychological Association contracted lawyer David Hoffman to investigate whether a group of psychologists led by James Mitchell and Bruce Jessen who were members of the APA; who were involved in various 'War on Terror torture practices'; such as: waterboarding were involved in 'unethical practices.'

After the September 11 attacks, the CIA asked James Mitchell to develop an interrogation program to help interrogators to effectively interrogate Al-Qaeda terrorists who were resisting interrogation. Put simply: the CIA wanted to know if Jessen could teach their interrogators to know when one of the terrorists they were interrogating sincerely did not know any question posed to the terrorist; or when the terrorist was hiding or withholding information; by pretending not to know answers to questions from the interrogator. James Mitchell had been a psychologist in the Air Force. In 1988 he became the chief of psychology at the Air Force survival school at Fairchild Air Force Base in Spokane, Washington. Mitchell Survival, Evasion, Resistance and Escape (SERE) training taught American soldiers psychological evasive techniques for how to survive torture if they were captured by Al-Qaeda and Al-Qaeda decided to torture them to get military classified information. Interrogation procedures consisted of the interrogator and terrorist suspect meeting in an interrogation room; where they engaged in a question and answer discussion. If the terrorist cooperated and answered all the interrogators questions as honestly and clearly the interrogation was totally cordial and nonviolent. Enhanced interrogation torture techniques were only used if (a) the terrorist refused to cooperate by refusing to answer questions or (b) used evasive psychological techniques to avoid answering questions; as confirmed by a psychologist as symptoms of evasive techniques used by soldiers to avoid answering questions.

The [enhanced interrogation techniques](#) included prolonged stress positions, hooding, subjection to deafening noise, sleep deprivation to the point of hallucination, deprivation of food, drink, and withholding medical care for wounds; waterboarding, walling, nakedness, subjection to extreme cold, confinement in small coffin-like boxes, and repeated slapping or beating. Interrogators were restricted to conducting the enhanced interrogation according to Judge Jay Bybee's [Torture Memo](#)'s wherein he clearly defined the lawfully approved 'enhanced interrogation techniques'.

There are neurological biological similarities between waterboarding and psychotronic manipulation of brain messages to the body. In waterboarding the interrogator physically restricts the body being tortured from receiving messages from the brain for a period of time ranging from 10 to 40 seconds; by restricting the brains access to oxygen; by covering the beings nose with water. In psychotronic manipulation of brain messages to the body; the brain EMF frequencies are manipulated by shutting them down for a period of time ranging from 10 to 40 seconds; by psychotronically restricting the brain from sending 'continue doing your work to allow the body to survive' messages to the necessary body parts.

Judge Jay Bybee and the CIA's definition of waterboarding is as follows: "In this procedure, the individual is bound securely to an inclined bench, which is approximately four feet by seven feet. The individual's feet are generally elevated. A cloth is placed over the forehead and eyes. Water is then applied to the cloth in a controlled manner. As this is done, the cloth is lowered until it covers both the nose and mouth. Once the cloth is saturated and completely covers the mouth and nose, air flow is slightly restricted for 20 to 40 seconds due to the presence of the

cloth... During those 20 to 40 seconds, water is continuously applied from a height of twelve to twenty-four inches. After this period, the cloth is lifted, and the individual is allowed to breathe unimpeded for three or four full breaths... The procedure may then be repeated. The water is usually applied from a canteen cup or small watering can with a spout... [The CIA has] ... informed [Judge Bybee] that it is likely that this procedure would not last more than twenty minutes in any one application.”

In [this interview](#) James Mitchell describes psychologists use of waterboarding as a torture interrogation technique to encourage terrorists to change their minds; and start answering the interrogators questions. In [this interview](#) Mitchell answers questions as to his motive for getting involved in enhanced interrogation techniques. In [Covert Operations of the NSA](#) John St Clair Akwei; a former NSA employee describes how the NSA can psychotronically manipulate the thoughts and bodily functions of any individual on the planet. Put differently; the NSA or any other nations intelligence agencies; such as Britain’s MI6, or Russia’s FSB/KGB; or Israel’s Mossad; can remotely manipulate the thoughts of any one or more persons; and/or kill any one or more persons; by psychotronically shutting off the brain’s signals to the heart; lungs, etc to ‘survive and continue living’. They can also remotely by psychotronics manipulate internal organs in the body; such as induce a heart attack or stroke, pull a tendon or muscle; fill the lungs with water to induce pneumonia; and aggravate an already inflamed intestine to activate an gastrointestinal bleeding attack.

A copy of the [Covert Operations of the NSA](#) document is filed in three court proceedings: (i) John St Clair Akwei vs National Security Agency: Ft George G. Meade, MD, USA (Civil Action 92-0449); (ii) State v Lara Johnstone about the 18 June 2002 PW Airport bomb threat made via the George Herald; (iii) GMC 2578-14: Lara Johnstone v Frode and Talitha Moe.

Mitchell was later reported to have personally waterboarded Khalid Sheikh Mohammed.

If the NSA, FSB, MI6 and/or Mossad were observing or manipulating the Ammon Bundy’s Malheur occupation and subsequent 26 January 2016 decision by Ammon Bundy and the occupiers to leave the Malheur refuge to go and do some political campaigning in Grant Co; whereupon they ran into the FBI road block and all were nonviolently arrested; except for Lavoy Finicum; who refused to be nonviolently arrested along with Ammon Bundy and drove off as if he was OJ Simpson on crack [See: [Mark McConnell statement](#); [Patriotic Warriors: Reasons Why](#) re: Mark McConnell statement]; possibly because he would rather have committed suicide by Sheriff/Cop than spend a day in a jail concrete box; as he had repeatedly stated he would rather die than be arrested [NNN: Gary Franchi: [Lavoy Finicum to FBI: I’d rather die than spend time in a concrete box](#)]; then they would have psychotronic ‘sight/sound/thoughts/body senses: heart rate, etc’ bodycam footage of the event.

This would obviously be very frightening for individuals who have a different private identity than their public identity. Put differently for individuals engaging in bullshit the public ‘public relations’ image management bullshit. If however your private identity is your public identity; then you wouldn’t give a fuck about anyone observing your thoughts; cause you ain’t got a problem saying what you really think.

McChrystal Group Org Psych: For Leaders, Soft is the New Strong

I noticed the 27 April 2018 McChrystal Group posting: [For Leaders, soft is the new strong](#); by McChrystal Group partner: Rachel Mendelowitz.

If that posting was your or McChrystal Groups response to correspondence to FSB & NSA [[PDF](#)] -- EoP Interpretation Data: 23 April 2016: NSA & FSB: EoP Int: 22 Apr Earth Day Local Events: JAG Steel Law & Stan McChrystal 'root cause problem solving vs wacking a mole' blackout – herewith my EoP response.

Hire another psychologist capable of clarifying in buck stops here village idiot English what the fuck the McChrystal Group organizational psychologist tits and ass slut is trying to say; with her use of the term 'psychological safety'.

For example: "As any student of organizational psychology could tell you, the topic of psychological safety is hardly new; in fact, psych safety has been established as one of, if not the, strongest predictor of team success in recent years."

I am not a student of organizational psychology; and have never pretended to be one. As for "in fact, psych safety has been established as one of, if not the, strongest predictor of team success in recent years."

What is the tits and ass slut pretending to be a psychologist's definition of 'success'? I imagine, the strongest predictor of any teams success; would depend on what their definition for success is.

It is quite possible that for certain definitions of success; the strongest predictor may be psychological safety; although I have not seen any objective evidence for such a factual statement. Before such a statement can be said to be a fact the individuals would first have to clarify what the groups definition of success was; and then what their definition of psychological safety was; and then clearly show that it was in fact the psychological safety factor; as opposed to any other factor; which was the determinant of them accomplishing their 'success' goal.

Corporations may hire fuck honour organizational psychologists to engage in fraudulent studies about what is or is not the factor in their war profiteering success; but I imagine; if the Pentagon tomorrow decided that they were going on strike; and that they would not be doing any raping, culling and conquering for American corporations; all multinational raping culling conquering corporations would soon go bankrupt; which they are going to be doing anyhow; hence their paranoia for more raping, culling and conquering; so they can bullshit their shareholders they are making a profit. So if 'profits' from raping, culling and conquering non-Americans; and turning the planet into a fucking toxic toilet; are the determinants of these corporations 'success'; were those profits a result of a bunch of fuck honour oligarchs and their corporate cocksucking civilians in corporate offices chatting about 'psychological safety' or the result of Pentagon hired psychopaths obeying fuck honour corporate oligarchs orders to rape, cull and conquer?

If your tribes definition of success; is not to be the slaves of fuck honour white men; then you'd be best picking a team of Pashtun Pakistanis; to avoid being enslaved by fuck honour kaffirs pretending to be Aryans. I don't think they give a fuck about 'psychological safety'; but they do give a fuck about their particular tribal definitions of honour. – Dmitry Orlov: [Five Stages of Collapse](#).

I imagine any rational thinking individual who is a corporate member of any military industrial complex related corporation; would far prefer small sustained profits from cooperating with Pentagon and/or Kremlin officials to provide military support for nations to implement Ecology of Peace orderly and humane depopulation and deindustrialization; to enable them to focus on transitioning their employees and corporations to an EoP [low tech sustainable economy](#); than billions of profits for a few years; that go up in smoke; when the entire world economy very violently collapses; and they find out that American cities and suburbs are no different than formerly nigger and spick only inner city ghetto's; where mothers, sisters, daughters and babies are gangraped for profits for crack. Then it will be too late for individuals who called themselves 'white men rulers of planet earth' to speak about 'justice' for anyone that looks like them; let alone everyone.

If you prefer to play ego Mindfuck games with Gen Bortnikov and/or Adm Rogers; that's fine.

Perhaps they have time to engage you; or the inclination to find one of their psychotronics drone operators who hasn't been fucked by his tits and ass slut wife or girlfriend that morning; and is in the mood for ego Mindfuck games; to play ego Mindfuck fuck fuck games with you. I don't play ego Mindfuck games with anyone: FSB General or homeless person. I tell them my subjective and objective truth; the whole truth; and nothing but the goddamn truth; and I do not consciously attempt to mislead or deceive anyone; friend or foe; [magistrate](#); or ICC Judge [[PDF](#)]. Ever!

If or when my subjective truths are proven to be inaccurate; I have absolutely no problem amending such subjective truth and/or apologizing; verbally and/or in writing.

Since the dumb fuck tits and ass slut has probably spent her entire 'organizational psychologist' life being the tits and ass slut 'brood sow propagandist' for 'America First' Big Pharma; its doubtful if she has had one fucking original idea, thought or sincere conversation in her life. If that's her existential preference; by all means; that's okay; she is hardly alone [[PDF](#)].

Any fucking imbecile who considers a study produced by corporate google to be some kind of objective truth evaluation of human nature; has got to be dumber than dumbfuck.

Why doesn't the lady test her 'psych safety' and 'success' values; by getting herself sentenced to a Mandelotopia or some other Heart of Darkness African dormitory prison; where she is the only lily white; amongst 40 African predators; and ask them what they think of her psych safety and success values. I doubt she will like their answers: Yes dumbfuck tits and ass progressive liberal; you want some profits; we can use you as our white meat tits and ass slut; and get the entire dormitory to gangrape fist fuck you for a few pennies; till you can't walk; and we can split the profits. How do you like our African predator psych safety success-profits response?

What goddamn part of -- 'when you are; or pretend to be the worlds 'America First' super power; and you do sweet goddamn fuck all for decades - presumably cause your entire culture is focused on nothing but corporate cocksucking of Hollywood like tits and ass sluts - about root cause problem solving and establishing a system of justice for all; your whacking a mole for corporate profiteering kaffirs pretending to be Aryan oligarchs; inaction leads to a fucking lot of resentment; where millions; perhaps billions of people around the planet; watching fuck honour American corporate profiteering whores terrorized into jumping out of the windows of World Trade Center skyscrapers; ranks amongst probably one of the happiest moments of their miserable lives -- Stan McChrystal '[root cause problem solving vs wacking a mole](#)'; does Ms McChrystal Group Organizational psychologist not understand?

A copy of this correspondence is documented in: (i) EoP Applicants: Stan McChrystal [[PDF](#)]; (ii) FSB & NSA [[PDF](#)]: Conflict Footprints; (iii) EoP v WiP NWO negotiations: Psych [[PDF](#)].

Lockheed Martin Brd Dir: Info Request to Mil Ind Complex; Re EoP or WiP Future Preference

I shall attempt to make this as short as possible.

In 29 April 2016 -- *EoP Response to McChrystal Group Org Psych: For Leaders, Soft is the New Strong* -- correspondence to Gen McChrystal [PDF]; regarding McChrystal Groups possible response to correspondence to FSB & NSA [PDF] -- *EoP Interpretation Data: 23 April 2016: NSA & FSB: EoP Int: 22 Apr Earth Day Local Events: JAG Steel Law & Stan McChrystal 'root cause problem solving vs wacking a mole' blackout* -- I made the following working hypothesis conclusion:

----- Excerpt: EoP Response to McChrystal Group -----

"I imagine any rational thinking individual who is a corporate member of any military industrial complex related corporation; would far prefer small sustained profits from

cooperating with Pentagon and/or Kremlin officials to provide military support for nations to implement Ecology of Peace orderly and humane depopulation and deindustrialization; to enable them to focus on transitioning their employees and corporations to an EoP [low tech sustainable economy](#); than billions of profits for a few years; that go up in smoke; when the entire world economy very violently collapses; and they find out that American cities and suburbs are no different than formerly nigger and spick only inner city ghetto's; where mothers, sisters, daughters and babies are gangraped for profits for crack. ----- End Excerpt: EoP Response to McChrystal Group -----

If my aforementioned working hypothesis regarding the possibility of rational individuals working for the military industrial complex corporations; being – like US Army Special Forces Michael Martin [PDF] or Hiram Stonebaker – cognitively [green platoon common sense](#) capable of the preference for making procreation, consumption and profit sacrifices to honourably cooperate with Pentagon, Kremlin, NATO and People's Liberation Army of China; to [implement an Ecology of Peace](#) international law social contract; that shall restrict all the worlds citizens, from all races and religions; to breeding and consuming below ecological carrying capacity limits; to enable orderly and humane deindustrialization and depopulation to a future EoP [low tech sustainable economy](#); are incorrect; I have absolutely no problem amending such subjective truth and/or apologizing; verbally and/or in writing to General McChrystal; McChrystal Group and/or Ms. Mendelowitz.

Re: *Hiram Stonebaker*:

"In this country we build obsolescence into our products. Our national economy is based on waste. People buy because things look good and are packaged attractively. Take toilet paper, for example. We are starting to manufacture it in colour. Our test market hops prove conclusively that pale green sells best in St. Louis while pink is big in Boston. We have editors to snag the public by verbal gymnastics; brown isn't brown, its tawny brown. We subtly key in sexually stimulating music to back up radio commercials. We know that men like blue-coloured after shave lotion. Sanitary napkins will soon be packaged in boxes of various shapes with striped and polka dot wrappings. So who cares how the motor runs as long as the upholstery has eye appeal and the exterior is junked up with enough chrome?" - Clint Loveless, Whitcomb Associates Public Relations

“Well ... its just that I've been wiping my ass on plain white toilet paper for almost sixty years and I can't figure out any difference and I wonder if you really can.” - General Hiram Stonebaker

EoP Summaries:

Here follows my EoP summary to Dmitry Orlov; from Club Orlov.

===== Excerpt: Dmitry Orlov: EoP Summary & Sixth Stage of Collapse =====

I hadn't read your [Sixth Stage of Collapse](#) before today; and its way more powerful than Five Stages. Totally agree. I hope you don't mind that I reposted it at: [In Gods Name](#); updating Five Stages re-posted in 2008.

I recently shared that Five; now Six Stages of Collapse link:

- [EoP Axis](#) Negotiations: US v A Bundy et al [PDF]: 26 April 2016 8:54 PM: *USA v A Bundy; Atlantic Ed & Journ: Re: Stan McChrystal 'root cause problem solving vs wacking a mole'; and WiP Case No. 16-MJ-00006: USA v A Bundy et al.*

You may wish to consider *EoP Axis Military Necessity Evacuation* blueprint ideas; with regard to your *Sixth Stage of Collapse* statement:

“This tragic [— **environmental collapse** — at the end of which we are left without a home, having rendered Earth (our home planet) uninhabitable] outcome may not be unavoidable. And if it is not unavoidable, then that's about the only problem left that's worth solving. The solution can be almost arbitrarily expensive in both life and treasure. I would humbly suggest that it's worth all the money in the world, plus a few billion lives, because if a solution isn't found, then that treasure and those lives are forfeit anyway. A solution for avoiding the sixth stage must be found, but I don't know what that solution would look like.”

[EoP Axis Military Necessity Evacuation](#) is the military necessity mutual coercion last resort option of the Ecology of Peace NWO social contract options. It provides a legal blueprint for how to legally, militarily, politically and economically implement an Ecology of Peace international law social contract; to enable immediate orderly and humane deindustrialization and massive depopulation measures.

The benefits of immediate implementation of humane and orderly depopulation measures are documented in among others: EoP Axis: Cop 21 [PDF: EoP Axis Humane De-Industrialization and Depopulation Options: 22 Jan 2016]. Furthermore Canadian Attorney Generals [PDF: 09 March 2016]; Hong Kong Prosecutor [PDF: 09 March 2016]; ICC Judges [PDF: 29 Dec 2015]; have been notified of the possibility that EoP Axis Military Necessity Evacuation measures shall be implemented.

If humane deindustrialization and depopulation is implemented internationally as per *EoP Cop21 Simple Root Cause Problem Solving Recommendation* [PDF] submitted to UNFCCC & Cop 21; and/or [EoP complaint to ICC](#); it would have greater positive effects on re-forestation, biodiversity and climate change than the extremely violent depopulation

implemented by Genghis Khan the Green; which only occurred in Eurasia; but resulted in massive reforestation and the plummeting of carbon levels.

Excerpts from: [Coupled climate-carbon simulations indicate minor global effects of wars and epidemics on atmospheric CO2 between AD 800 and 1850](#) study by Julia Pongratz; article: [Genghis Khan the GREEN: Invader killed so many people that carbon levels plummeted](#); Carnegie: [War, Plague No Match for Deforestation in Driving CO2 Buildup](#).

Genghis Khan has been branded the greenest invader in history - after his murderous conquests killed so many people that huge swathes of cultivated land returned to forest. The Mongol leader, who established a vast empire between the 13th and 14th centuries, helped remove nearly 700 million tons of carbon from the atmosphere, claims a new study. The deaths of 40 million people meant that large areas of cultivated land grew thick once again with trees, which absorb carbon dioxide from the atmosphere. And, although his methods may be difficult for environmentalists to accept, ecologists believe it may be the first ever case of successful manmade global cooling.

Genghis Khan and his Mongol hordes had an impact on the global carbon cycle as big as today's annual demand for gasoline. The Black Death, on the other hand, came and went too quickly for it to cause much of a blip in the global carbon budget. Dwarfing both of these events, however, has been the historical trend towards increasing deforestation, which over centuries has released vast amounts of carbon dioxide into the atmosphere, as crop and pasture lands expanded to feed growing human populations. Even Genghis Kahn couldn't stop it for long.

"It's a common misconception that the human impact on climate began with the large-scale burning of coal and oil in the industrial era," says Julia Pongratz of the Carnegie Institution's Department of Global Ecology, lead author of a new study on the impact of historical events on global climate published in the January 20, 2011, online issue of The Holocene. "Actually, humans started to influence the environment thousands of years ago by changing the vegetation cover of the Earth's landscapes when we cleared forests for agriculture."

Clearing forests releases carbon dioxide into the atmosphere when the trees and other vegetation are burned or when they decay. The rise in atmospheric carbon dioxide resulting from deforestation is recognizable in ice cores from Greenland and Antarctica before the fossil-fuel era.

But human history has had its ups and downs. During high-mortality events, such as wars and plagues, large areas of croplands and pastures have been abandoned and forests have re-grown, absorbing carbon dioxide from the atmosphere.

Pongratz decided to see how much effect these events could have had on the overall trend of rising carbon dioxide levels. Working with colleagues at the Max Planck Institute for Meteorology in Germany and with global ecologist Ken Caldeira at Carnegie, she compiled a detailed reconstruction of global land cover over the time period from 800 AD to present and used a global climate-carbon cycle model to track the impact of land use changes on global climate. Pongratz was particularly interested in four major events in which large regions were depopulated: the Mongol invasions in Asia (1200-1380), the Black Death in Europe (1347-1400), the conquest of the Americas (1519-1700), and the Fall of the Ming Dynasty in China (1600-1650).

"We found that during the short events such as the Black Death and the Ming Dynasty collapse, the forest re-growth wasn't enough to overcome the emissions from decaying material in the soil," says Pongratz. "But during the longer-lasting ones like the Mongol invasion and the conquest of

the Americas there was enough time for the forests to re-grow and absorb significant amounts of carbon.”

The global impact of forest re-growth in even the long-lasting events was diminished by the continued clearing of forests elsewhere in the world. But in the case of the Mongol invasions, which had the biggest impact of the four events studied, re-growth on depopulated lands stockpiled nearly 700 million tons of carbon absorbed from the atmosphere. This is equivalent to the world’s total annual demand for gasoline today.

Pongratz points out the relevance of the study to current climate issues. “Today about a quarter of the net primary production on the Earth’s land surface is used by humans in some way, mostly through agriculture,” she says. “So there is a large potential for our land-use choices to alter the global carbon cycle. In the past we have had a substantial impact on global climate and the carbon cycle, but it was all unintentional. Based on the knowledge we have gained from the past, we are now in a position to make land-use decisions that will diminish our impact on climate and the carbon cycle. We cannot ignore the knowledge we have gained.”

As noted in Request for Assistance of Counsel to renowned Philippine’s Environmentalist lawyer: Tony Oposa [PDF]; if EoP Applicants cannot find any civilian attorneys to support their EoP ICC complaint; EoP Axis authorities can choose to implement the [military necessity](#) mutual coercion last resort option of the [Ecology of Peace NWO social contract options](#).

If EoP Axis authorities – Leaders of Russia, China, USA & NATO – and/or IL Coercion authorities choose to implement the [EoP Axis Military Necessity Evacuation](#) – as detailed in *26 September 2015 Military Necessity Evacuation Lotto Pool Notice to Nation State Supreme Court Judges & Attorney Generals of: Bahrain, Brazil; Brunei, Burundi, China, Germany, India, Japan, Kuwait, Luxembourg, Mali, Malta, Mexico, Monaco, Netherlands, Niger, Philippines, Qatar, Singapore, Somalia, South Korea, Uganda, United Kingdom, United States of America, Vatican City* [PDF]; Proof of Service [PDF] – the first two countries on the EoP Axis Military Necessity Evacuation lotto are: Phillipines [PDF] and India [PDF].

Lotto Military Necessity Evacuation implementation shall result in half of India and Phillipines – or subsequent lotto draw nations – scarcity combatants and breeding/consumption war extremist’s – whom Masonic War is Peace legislators, lawyers and judges formerly provided with [Breeding/Consumption Innocence for sale Indulgences](#) – being psychotronically humanely killed en masse; unless their city or the citizen has signed EoP Axis Oaths and provided such oaths to EoP Axis authorities as documented at [EoP Supporters](#).

An EoP Military Necessity Evacuation:

- (a) Scarcity combatant is any citizen who is a member of the following professions: (i) Law: Judges, Prosecutors & Lawyers; (ii) Mental Health: Psychologists & Psychiatrists; (iii) Media: Print, TV or Radio: Editors, Producers & Journalists; (iv) Religious & Non Profit: Officials and Employees of any religious worship or charity organization with State non-profit status.
- (b) Breeding / consumption war extremist is any adult individual over the age of 18 who has co-procreated more than 3 children who survived beyond the age of 5; and/or who possesses capital assets amounting to more than US \$ 2.55 million.

[..]

But "Market Garden" was by no means the summit of Montgomery's ambition. On September 10, in a stormy conference held aboard Eisenhower's private plane in the airport at Brussels, the Field Marshall had bitterly criticized the American's policy of advancing on a broad front -- as opposed to the narrow rapier-like thrusts advised by Montgomery. Patton's drive to the Saar River, he complained, was robbing him, Montgomery, of vital supplies; "jerky and disjointed thrusts" were equally impeding both armies and achieving nothing. At one point his language grew so unrestrained that Eisenhower, reaching out, patted Montgomery on the knee and rebuked him, "Steady Monty! You can't speak to me like that. I'm your boss. "Montgomery's mounting anger cooled. "I'm sorry, Ike", he said quietly.

But Eisenhower remained wedded to the broad front concept. "What you're proposing is this," he told Montgomery incredulously, "if I could give you all the supplies you want, you could go straight to Berlin -- right straight to Berlin? Monty, you're nuts. You can't do it... you'd have to throw off division after division to protect your flanks from attack... Suppose you did get a bridge across the Rhine, you couldn't depend for long on that one bridge to supply your drive..."As Eisenhower later recalled it, Montgomery argued: "Just give me what I need and I'll reach Berlin and end the war." Patton, equally cocksure, boasted, "If Ike stops holding Monty's hand and gives me the supplies, I'll go through the Siegfried Line like shit through a goose..."

Thus the stage was set for disaster from the first

But what worried him the most, says D'Antonio, is Trump's belief that he is genetically superior to most people in the world. In all of their conversations, he notes, Trump kept returning to the notion that by virtue of his birth, he is simply better than other people in many areas -- from playing golf to being a businessman. "I'm a big believer in natural ability," Trump said. His son, Donald Trump Jr., shares his father's conviction. He said he was a firm believer in the concept of breeding, in "race-horse theory." Then he pointed at the ceiling with his finger, in the direction of his father's office. "He's an incredibly accomplished guy, my mother's incredibly accomplished, she's an Olympian, so I'd like to believe genetically I'm predisposed to (be) better than average."
